PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

The undersigned are prepared to introduce into use in Tenness e W. E. CHILDS & CO.'S PATENT ELAS-TIC VIRK AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Com-panies, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fail to ARCHITECTS AND BUILDERS should not that to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth surface that will resist the action of the atmosphere in every climate. It is impervious to water, elastic, and flexible. It contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to its durability, there is no question. ts durability, there is no question. Its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Roofing on over ordinary good heathing, old shingles, tar and gravel, tio, sinc, copper, or iron roofs -it making no difference how steep or flat they may be-for seven dollars per one hundred square feet; it being far cheaper than any Boof of the old style, and we are sure it

will give better satisfaction.

It will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, souttles, dormar windows, and gutters, where the fin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to smy object to which it is applied. Tin Roofs can be painted over (and warranted not to leak) at two d liars and fifty cents per hundred square feet, which is cheaper and much better than paint. This Rooting will be found to be the best theng for covering large Roofs where they are exposed to for such as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges. Depots, Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from the. As the Roof is perfect, without a joint in it, it presents no chance for fire to communicate, and any light substance will burn out without igniting. Insurance Offices at Cincinnati, and other places where Childs & Co.'s Cement has been used, insure Buildings with Roofs powered with this Cement, at the same ates as for those covered with Iron, Copper or Tin.
The Cement will be furnished to those at a distance

with directions for using.

No. 24, Spruce Street. TESTIMONIALS AND REPERENCES.

OFFICE HUGERY STATE INSURANCE COMPANY, CINCINNATI, Dec. 16, 1856 TO ALL WHOM IT MAY CONCERN: This is to certify that have examined specimens and Roofs of W. E. Childs & Co. "Elastic Fire and Water-Proof Cement Roofing," and be lieve it to be eminently superior to any other kind of Roof-ing in use. I was an eye witness of a severe trial of one of there Roofs from a large volume of flame from an adjoining building, which struck directly upon the roof and coroice for nearly half an hour. It stood the trial beyond all expectation, and saved the building, T. M. HASKELL, President Buckeye State Insurance Co.

CINCINNATI AGENCY ROYAL INSURANCE COMPANY, } I have examined W. E. Childs & Co.'s "Flastic Fire and Water Proof Cement Roofing," and, as far as I can Judge, consider it a great invention, and am willing to insure wildings thus protected upon the same terms as I insure hose covered by metal. JNO. S. LAW, Agent Royal Ins. Co., London and Liverpoot.

From J. B. Bennett, General Agent of Eina Ins. Co. for the Southern and Western States.

Ciscussari, Jan. 7, 1857.

Having made considerable inquiry as to the merits of the
'Patent Elastic Cement Scoting," introduced into this city
by Childs & Co., I find it to be highly recommended in this that it is meeting with very ready and general introduction; that its superiority over the tar composition Roofing is decided and freely admitted; and finally, I expect to adopt it for my next roof, which will be next summer—having intended to use tin, but will try
the virtues of the "Patent Elastic Roofing" as a substitute.
Yours, truly,
J. B. BENNETT.

OFFICE OF THE CIN, HAM AND DATTON RAILROAD, Childs & Co.'s Patent Cement Roefing is now used here on our best class of Buildings. We are covering our Freight Cars with it, and our Master Mechanic reports very favorable to it.

Yours, truly, E. LIPPENCOTT, Supply Agent Ohio & Miss. R. R. Chicago is now the greatest grain market in the world-and the facility and economy with which the products o these lands can be transported to that market, make them much wore profitable, at the prices asked, than those more remote at government rates,—as the additional cost of transportation is a perpetual tax on the latter, which must he borne by the producer, in the reduced price he receives for his grain, &c.
